

Samancor: Metal Production Learnerships 2026 | 2027 Apply Here

Description

Join our Metal Production Learnership program at Samancor, where you'll have the opportunity to gain hands-on experience and valuable skills in metal production. This learnership aims to equip individuals with theoretical knowledge and practical training in the mining and production processes of chrome and manganese.

Responsibilities

- Participate in classroom-based theoretical learning sessions to understand the fundamental principles of metal production.
- Receive practical training in various aspects of the production process, including ore handling, smelting, refining, and quality control.
- Collaborate with experienced professionals to learn and apply best practices in the mining and production of chrome and manganese.
- Adhere strictly to safety protocols and procedures while operating within the mining environment.
- Engage actively in assessments and evaluations to gauge learning progress and competency levels.
- Contribute positively to the team dynamics and cultivate a culture of continuous improvement and innovation.

Qualifications

- High school diploma or equivalent qualification.
- Passion for the mining and metal production industry.
- Strong commitment to safety practices and protocols.
- Excellent communication and teamwork skills.
- Ability to follow instructions and work effectively in a dynamic environment.
- Willingness to learn and adapt to various facets of metal production processes.

Job Benefits

- Valuable hands-on experience in the metal production industry.
- Comprehensive training and mentorship from industry experts.
- Competitive stipend or compensation for the duration of the learnership.
- Opportunity for potential permanent employment based on performance and available vacancies.
- Exposure to a diverse and dynamic working environment.
